DTS201TC project submission requirements

- You are expected to write your solutions to Task1 and Task2 on the answer sheet.

- If you implement task 3,4 and 5 with pseudocodes, please put your solutions on the answer sheet as well.

- You can present your solutions in any ways your prefer:

  - type in the file
  - take photos of your handwriting, and insert them in corresponding positions in the answer sheet
  - print the answer sheet, write on it and then scan it into a pdf.

- If you implement task 3,4 and 5 with coding, you don't need to put the codes onto the answer sheet. Instead, submit the code file, (either .ipynb or .py is ok) along with the answer sheet.

- No matter you use answer sheet in .tex or .docx, you are expected to submit the file in .pdf finally.

- Name of your files: **DTS201TC_Project_[yourname]**

- If you have two files to submit, you don't need to compress two files in one folder. Submit two files separately.
